PROFILE

Full-stack developer with 5+ years building production systems across enterprise and consulting contexts. TypeScript front to back, solid in C#/ .NET, with Rust as an active focus. Background spans shipbuilding, supply chain planning, and healthcare. Set architecture from scratch multiple times, led small teams through delivery. Currently leading frontend architecture and API design for CyberPlan's next major release at Cybertec (Zucchetti Group).

WORK EXPERIENCE

Lead Full-Stack Developer

Nov 2025 – Present · Trieste, Italy (Hybrid)

Cybertec S.r.l. (Zucchetti Group)

Enterprise APS software vendor (Gartner-recognized), serving manufacturing clients globally with the CyberPlan platform.

- Took over a greenfield frontend with no existing conventions and designed the React architecture from scratch for CyberPlan's next major release. The team adopted it as the standard.
- Work directly with product to turn S&OP domain requirements into concrete API and UI decisions.
- Bringing legacy and greenfield modules to a consistent standard without disrupting production.

Stack: React · TypeScript · JavaScript · S&OP · Enterprise Architecture

Software Developer

Nov 2024 – Nov 2025 · Rome, Italy (Remote)

Tecnolife IT Consulting S.r.l.

IT consulting firm delivering custom software solutions for clients across various industries.

- Built React applications from zero with no existing standards. The component structure I put in place became the template for the team's subsequent projects.
- Introduced Docker across development, QA, and production to fix environment parity issues. The problem stopped recurring.
- Mentored a junior developer on React architecture; within a few months they were shipping features independently.

Stack: React · TypeScript · JavaScript · Docker · Frontend Architecture

Digital Transformation Analyst

Apr 2021 – Oct 2024 · Trieste, Italy (Hybrid)

FINCANTIERI S.p.A.

One of the world's largest shipbuilding groups, operating 18 shipyards globally. Progressed from internship to full-time analyst over 3.5 years.

- Designed a full-stack architecture (React + .NET 6/8 + Entity Framework) the team later adopted as the standard template for all SharePoint Online platform work.
- Coordinated up to 4 developers across ~10 concurrent projects, hitting ~90% UAT pass rate while managing change requests, release pipelines, and direct end-user relationships.
- Built internal React/Storybook and .NET libraries shared across multiple applications — cut per-project setup time and stopped the team from rebuilding the same components repeatedly.
- Built an Android AR app in Unity that let field workers view 3D ship assembly plans on their phones, no specialist hardware required.

Stack: React · TypeScript · JavaScript · Storybook · .NET 6/8 · Entity Framework · SharePoint Online · CI/CD · Unity (AR)

Android & Web Developer

Jan 2019 – Jul 2019 · Trieste, Italy (On-site)

CodaQ S.r.l.s.

Small software studio at Area Science Park, focused on Android and cross-platform mobile applications for healthcare clients.

- Built an Android app integrated with an existing queue management system, with a runtime-configurable UI so staff could update content without triggering a redeployment.
- Built a cross-platform patient flow management app for IRCCS Materno Infantile "Burlo Garofolo" using Angular and NativeScript.

Stack: Android · Java · Angular · NativeScript · TypeScript · JavaScript · Healthcare Software

TECHNICAL SKILLS

PRIMARY	TypeScript · JavaScript · C# · React · Node.js · .NET 6/8 · Entity Framework · Docker · PostgreSQL · SQL Server
ALSO	Rust · Python · Dart/Flutter · React Native · Next.js · Astro · Hono · Bun · Ionic · Vue · Prisma · GraphQL · MongoDB · Redis · Supabase · Firebase · Appwrite · Kubernetes · Azure · GitHub Actions · Terraform · Traefik · Tauri
GAME / SYSTEMS	wgpu · ECS · Unity · Three.js · WebGL · AR Foundation
CREATIVE	Blender (Hard Surface · 3D Printing) · Substance Painter · Substance Designer

NOTABLE PROJECTS

Custom Game Engine

Private repository

High-performance game engine with a Rust core, using wgpu for GPU abstraction and ECS patterns for systems design. Editor and tooling UI built with React and Tauri.

Rust · Tauri · wgpu · ECS

Orchisoftair Website

github.com/raffitheo/orchisoftair-website

Production website for A.S.D. Gli Orchi Trieste, an Italian airsoft team. Full ground-up rewrite migrating from React/Vite/Appwrite to Next.js App Router with a Supabase backend, shadcn/ui components, and automated deployment via Vercel.

Next.js · TypeScript · JavaScript · Supabase · Sass · shadcn/ui · Vercel

Personal Portfolio

github.com/raffitheo/portfolio

Personal site built with Astro, using JSON-driven content collections for static generation and localization. Easy to update without rebuilding components.

Astro · TypeScript · JavaScript · TailwindCSS

EDUCATION

Higher Technician — Development & Management of Biomedical IT Solutions

Fondazione ITS "Alessandro Volta" · Trieste, Italy · Graduated top of class

Curriculum covering C, Java, web, Android, AR/VR/MR, databases, software engineering, networking, and medical device regulations. Included 6-month internship at CodaQ S.r.l.s.

High School Diploma — Chemistry, Materials & Biotechnology

Istituto Tecnico Statale "Grazia Deledda - Max Fabiani" · Trieste, Italy

LANGUAGES

Italian Native (C2)	French Native (C2)	English Advanced (B2)	German Beginner (A1) — actively studying
